Foreword

The 1982 Edition of the North Carolina Pesticide Report represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner the information collected during the 1982 calendar year. We hope that more readers will be able to use it more effectively and be able to understand how its use can facilitate the pesticide industry from manufacturer to consumer.

This will also acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report: *Pesticide Section* - Jean G. How to Use This Report

Considerable time and effort has gone into editing and organizing this 1982 edition of the Pesticide Report. Every section has been updated, new information added as necessary and details expanded to make this Report a more complete and up-to-date reference as to the sale and use of pesticides in North Carolina.

In this Pesticide Report you will find:

Introduction

Samples at Variance From Guarantee, 1982

This table lists the samples found by the Department's laboratories to be at variance from guarantee in 1982. The table also lists the name of each manufacturer, each pesticide brand name, and presents data and a description indicating how each sample examined varied from guarantee.

Other Violations, 1982

This section gives the names of firms that manufactured or distributed products in North Carolina and had one or more violations under the North Carolina Pesticide Law of 1971. These violations constituted either unregistered or misbranded products examined at pesticide outlets but not sampled for analysis.

Summary of Regulatory Activities Performed Under the North Carolina Pesticide Law, 1982

This section presents a summary of the total numbers of manufacturers who registered pesticides in North Carolina; pesticide formulations registered; pesticides examined; stop-sale, stop-use, or removal orders issued; licenses issued; and equipment inspections.

Introduction

Pesticides cover a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are likewise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971, it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971, the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary, required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969, the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N. C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted.

The N. C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted-use pesticides and requires the licensing of all pesticide dealers who sell restricted-use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture before it can be legally offered for sale in the State. A $25.00 registration fee for each brand or grade must accompany each Application for Registration.

As under the economic poison law, a state-wide inspection service will be maintained for the collection of official samples of pesticides from dealers. Individual requests for inspections are also made. As authorized, additional pesticide samples will be taken at the user level as they are being applied to determine if they are being used in an approved manner. Samples of the commodity to which pesticides have been applied will also be taken when deemed appropriate.

Samples are sent to the Department's laboratories for analysis. Reports of analytical results are forwarded to manufacturers, dealers, and users. As a further means of reporting, the Pesticide Report covering a year's work as exemplified herewith, is published annually.

Brief of the North Carolina Pesticide Law of 1971

Governing Body

North Carolina Pesticide Board

Administrative and Enforcement Authority

Commissioner of Agriculture, Raleigh, N. C.

Assists the Board and Commissioner in an advisory capacity

North Carolina Pesticide Advisory Committee

Restricted-Use Pesticides

Any pesticide may be designated as a "restricted-use pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted-Use Pesticides include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted-Use Pesticide." (Restricted-Use Pesticides have been established by regulation.)

Pesticide Dealer Licensing Requirement

All pesticide dealers who sell restricted-use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a fee of $25. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture, accompanied by a fee of $25 for each license, on or before the first day of January of the calendar year for which the license is issued. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

Pesticide Applicator Licensing Requirement

No person shall engage in the business of pesticide application within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a fee of $25 for each applicator's license and an additional $10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or manages a pesticide application business which is engaged in the business of applying pesticides upon the lands or properties of another; any public operator; any private golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who acts as a pesticide applicator and is not exempt from this definition. It does not include:

a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.

b. Any person regulated by the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator.

Pest Control Consultant Licensing Requirement

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual fee of $25. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. However, the North Carolina Pesticide Board may waive the requirement for taking parts of the North Carolina consultant examination provided the applicant has a Ph.D., master's, or bachelor's degree in the discipline pertinent to the category for which a license is desired and provided the applicant has demonstrated successful completion of pertinent academic training or has passed a written or oral examination offered by another state or a professional organization. Applicants will be required to successfully complete written, or written and oral, examination(s) which demonstrates adequate knowledge of pertinent subject matter not specifically completed in academic training including knowledge of applicator state and federal pesticide laws and related subject matter.

Handling, Storage, and Disposal of Pesticides

No person shall handle, transport, store, display, or distribute pesticides in such a manner as to endanger man or his environment.

Registration

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State shall be registered and such registration shall be renewed annually.

Registration Fee and Delinquent Penalty

A registration fee of $25 for each brand or grade of pesticide is required. An additional $25 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

Refusal or Cancellation of Registration

Registration is subject to refusal or cancellation for cause and upon hearing.

Deficiencies

A deficiency penalty of three times the percentage deficiency times the retail value of any product sold subsequent to sampling and prior to repossession, but not less than $25 shall be assessed against any registrant of a pesticide found deficient in active ingredients.

"Stop Sale, Stop Use Orders"

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use Orders."

Civil Penalties

The Pesticide Board may assess a civil penalty of not more than $2,000 against any person who violates certain specifically enumerated provisions of this Law. In determining the amount of any penalty, the Board may consider the degree and extent of harm caused by the violation and the cost of rectifying the damage caused by the violation.

Notwithstanding any other provision of this Law, the maximum penalty which may be assessed under this section against a "private pesticide applicator" is $500 and such penalties may be assessed only for willful violations.

Other Penalties

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a misdemeanor and for each violation shall be liable for a penalty of not less than $100 or more than $1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties.

NOTE: Copies of the North Carolina Pesticide Law of 1971 and additional copies of the regulations adopted by the North Carolina Pesticide Board may be obtained upon request to the Pesticide Section, North Carolina Department of Agriculture, P.O. Box 27647, Raleigh, North Carolina 27611.

received by the food and drug protection division, the following 5007
procedure is initiated:
(1) The application forms are stamped with the date of 5008
receipt. 5009
(2) The application forms are examined to assure that all 5011
copies are properly filled out. Minor errors or deletions 5013
are corrected by office action.
(3) Registration fees submitted are verified for correctness 5014
by matching the number of pesticide products listed on the 5016
applications with the monies received.
(4) Pesticide products listed on the applications are examined 5017
to verify that the required labels or labeling were 5018
submitted. 5019
(5) Pesticide products listed on the applications are examined 5020
along with respective labels or labeling to determine 5021
whether additional information or data will be required. 5022
(6) Registration records are checked to determine if the 5023
registrant has any outstanding "stop sale," "stop use," or 5025
"removal" orders issued against any of the pesticide
products listed on the applications or any other pesticide 5026
product not listed on the applications which bear the 5027
registrant's name and address and/or is not registered in 5028
North Carolina:
(a) If an outstanding "stop sale," "stop use," or "removal" 5029
order is found on record, the application for 5030
registration is placed on "hold." 5031
(b) When the "stop sale," "stop use," or "removal" orders 5032
have been cleared, processing the application is 5033
completed in accordance with the North Carolina 5034
Pesticide Law of 1971 as outlined herein. 5035
(7) If the applications include all required information in 5036
correct form, no "stop sale," "stop use," or "removal" 5037
orders are found on file, and all required fees have been 5038

submitted, all copies of the application forms along with 5040
the registration fees are turned over to the North
Carolina Department of Agriculture, accounting division, 5041
for deposit of the registration fees. 5042

(8) After processing, the accounting division stamps a deposit 5043
receipt number on all copies of the applications, and 5045
returns all copies to the food and drug protection 5046
division.

(9) In case the registrant does not submit with the 5047
application forms the information and/or registration fees 5048

SECTION .0400 - SAMPLES AND SUBMISSIONS 5188

.0401 SAMPLES; SUBMISSIONS 5190

(a) Personnel of the food and drug protection division are 5192 authorized and directed to sample, test, inspect, and make 5193 analysis of pesticides sold, offered for sale, distributed, or 5194 being applied within this state, at the time and place and to 5195 such an extent as is deemed necessary to determine whether such 5196 pesticides are in compliance with the provisions of the North 5197 Carolina Pesticide Law of 1971.

(b) An official analysis is made from the official sample. An 5198 official check sample is kept until an analysis has been made of 5199 the official sample. If the official sample analysis does not 5200 pass analysis, an official check sample is retained for 90 days 5201 in order to allow the registrant to obtain a portion of it for 5202 his own analysis, if he so chooses. Requests for portions should 5203 be made in writing to the Food and Drug Protection Division, 5204 North Carolina Department of Agriculture, Raleigh, North 5205 Carolina, 27611.

History Note: Statutory Authority G.S. 143-446; 5208
Eff. February 1, 1976; 5209
Amended Eff. August 1, 1982; January 27, 1978. 5210

.0402 TOLERANCES 5212

In regards to establishing tolerances providing for reasonable 5214 deviations from the guaranteed analysis statement, the following 5215 guidelines are adopted: 5216

(1) that, in general, a "passed" judgment on a pesticide 5217 formulation be made if the analytical results are within 5218 the following guidelines: 5219

Pesticide Active Ingredient Guarantee, Percent	Allowable Deviation Below Guarantee	
1.00	15% of Guarantee	5225
1.00 - 19.99	0.1 plus 5% of Guarantee	5226
20.00 - 49.99	0.5 plus 3% of Guarantee	5227
50.00 -100.00	1.0 plus 2% of Guarantee	5228

Additional considerations: 5230

(a) If a sufficient number of samples as determined by the 5233 food and drug protection division of a given product 5234 indicate that the manufacturer is not formulating the product to achieve the level of the guarantee, an 5235 administrative judgment may be made to warn the 5236

formulator against the practice of formulating products 5237
in a manner only to stay within the allowable deviation 5238
from the guarantee.

(b) A sample result falling outside of the guidelines may 5240
not necessarily be "deficient" if one of the following 5241
factors could reasonably be expected to have 5242
contributed significantly to the off-limits analysis:

(i) special sampling problems, such as fertilizer- 5245
pesticide mixtures and certain granular products; 5246

(ii) accuracy, specificity, reproducibility, etc., of 5248
the methods used when applied to the particular 5249
formulation;

(2) that, allowable deviations, similar to those for 5251
"deficiencies," are not applicable to "overages." Each 5252
sample analysis will be judged individually as to whether 5253
or not the overage is excessive by using the following 5254
criteria:

(a) no illegal residues resulting from use according to 5255
directions; 5256

(b) no significant additional hazard to applicator or user; 5257

(c) no significant damage to non-target organisms or the 5259
environment; 5260

(d) stability of ingredients and the need for "over- 5262
formulating";

(e) accuracy, specificity, reproducibility, etc., of the 5263
methods used when applied to the particular 5264
formulation.

History Note: Statutory Authority G.S. 143-446; 5267

Amended Eff. August 1, 1982; January 27, 1978. 5269

.0403 PESTICIDE SAMPLING PROCEDURES 5271

(a) Procedures for sampling pesticides vary in accordance with 5274
the type of pesticide to be sampled and the type of sample to be 5275
taken.

(b) Pesticide samples are classified according to the 5276
following categories and procedures: 5277

(1) "Formulation samples" must be taken from the 5278
manufacturer's original unopened container using clean 5279
sampling equipment so as to avoid any contamination. 5280
Judgments are based on tolerances for reasonable 5281
deviations from the guaranteed analysis statement.

(2) "Pesticide use samples" are obtained by division 5282
personnel who may sample pesticides from the consumer 5283
as it is being applied or during preparation for 5284
application. Judgments are made depending on the 5285

directions for use contained on the registered 5286
pesticide label.
(3) "Pesticide commodity samples" are obtained by division 5287
personnel who are authorized to sample commodities and 5289
submit them for analysis in order to determine whether
properly registered pesticides have been applied 5290
according to label directions. 5291
(4) "Pesticide incident samples" are obtained by division 5292
personnel who are authorized to take samples, inspect, 5293
and investigate any incidents in which pesticides are 5294
reported or thought to be involved. 5295

.0601 DEFINITIONS 5970

The following definitions will be in effect throughout 2 NCAC 10D .0600: 5973

(1) "Complete destruction" of pesticides means alteration by physical or chemical processes to inorganic forms. 5974 5975

(2) "Container" means any package, can, bottle, bag, barrel, drum, tank, or other containing device (excluding spray applicator tanks) used to enclose a pesticide or pesticide-related wastes. 5976 5977 5978 5979

(3) "Excess pesticides" means all pesticides which cannot be legally sold or which are to be discarded. 5980 5981

(4) "Inorganic pesticides" means noncarbon-containing substances used as pesticides. 5982 5983

(5) "Heavy metals" means metallic elements of higher atomic weights, including but not limited to arsenic, cadmium, copper, lead, mercury, manganese, zinc, chromium, tin, thallium, and selenium. 5984 5985 5986 5987

(6) "Metallo-organic pesticides" means a class of organic pesticides containing one or more metal or metalloid atoms in the structure. 5988 5989 5990

(7) "Organic pesticides" means carbon-containing substances used as pesticides, excluding metallo-organic compounds. 5991 5992

(8) "Pesticide incinerator" means any installation capable of the controlled combustion of pesticides, at a temperature of 1000 degrees Centigrade (1832 degrees Fahrenheit) for two seconds dwell time in the combustion zone, or lower temperatures and related dwell times that will assure complete conversion of the specific pesticide to inorganic gases and solid ash residues. 5993 5994 5995 5996 5997 5998

(9) "Pesticide-related wastes" means all pesticide-containing wastes or by-products which are produced in the manufacturing or processing of a pesticide and which are to be discarded, but which, pursuant to acceptable pesticide manufacturing or processing operations, are not ordinarily a part of or contained within an industrial waste stream discharged into a sewer or the waters of the state. 6000 6001 6002 6003 6004 6005 6006

(11) "Sanitary landfill" means an approved disposal facility employing an engineered method of disposing of solid 6013 6014

wastes on land in a manner which minimizes environmental 6015
hazards by spreading the solid wastes in thin layers, 6016

volume and applying cover material at the end of each 6018
working day.

(12) "Specially designated landfill" means a landfill at which 6020
complete protection is provided for the quality of surface 6021
and subsurface waters from pesticides, pesticide 6022
containers and pesticide-related wastes deposited therein, 6023
and against hazard to public health and the environment. 6024
Such sites should be located and engineered to avoid 6025
direct hydraulic continuity with surface and subsurface 6026
waters, and any leachate or subsurface flow into the 6027
disposal area should be contained within the site unless 6028
treatment is provided. Monitoring wells should be
established and a sampling and analysis program conducted. 6029

be given to procedures designed to recover some useful value from 6040
excess pesticides and containers. Where large quantities are 6041
involved, the excess material should be used for the purpose 6042
originally intended, provided this use is legal. 6043

(b) Organic pesticides which do not contain mercury, lead, 6044
cadmium, or arsenic may be disposed of by incineration at 6045
temperatures which will ensure complete destruction. 6046

(c) Incineration is not applicable to those pesticides which 6047
contain heavy metals such as mercury, lead, cadmium, or arsenic, 6048
nor is it applicable to those organic pesticides or other 6049
metallo-organic pesticides which have not been treated to remove 6051
the heavy metals.

(d) If incineration is not applicable or available, disposal 6052
in specially designated landfills is an alternative. 6053

(e) All disposals of excess pesticides and pesticide-related 6054
wastes shall be instituted under approval and supervision of a 6055
pesticide disposal committee of the North Carolina Pesticide 6056
Board. This committee shall receive application for the desired 6057
disposal task, review each problem based on its individual 6058
circumstances and complexity, and submit a recommended solution 6059
plan to the disposal applicant. 6060

(a) All agricultural aircraft operations in North Carolina shall comply with the Federal Occupational Safety and Health Act of 1971 (OSHA), the North Carolina Occupational Safety and Health Law, and regulations established thereunder. All agricultural aircraft operations shall comply with those parts of F.A.R.-137 not covered in this Regulation. In any case of conflict, a regulation of the aforenamed authorities takes precedence over any of this article.

(b) Each aerial application business shall have a licensed contractor. The contractor shall be responsible for the compliance of the business with all pesticide regulations except where responsibility is specifically designated to another person(s) by these Regulations.

(c) All agricultural aircraft operations shall keep a record of all custom applications showing the following:

(1) name of contractor;

(2) name and address of the person for whom the pesticide was applied;

(3) identification of farm or land sites treated with pesticide(s);

(4) name of crop which was treated;

(5) total number of acres treated;

(6) the year, month, day, and approximate time the pesticide was applied;

(7) the brand name of the pesticide(s) and EPA registration number;

(8) amount of formulated product or active material applied per acre (must specify);

(9) total gallons or pounds per acre of the final tank mix applied per acre;

(10) name of pilot;

(11) signature of person completing this record.

(d) The pilot shall, prior to application, learn and confirm:

(1) the boundaries and exact location of the target area(s),

(2) the identity of nontarget areas and safety hazards located on or adjacent to the target areas.

(e) Spray and spreading equipment shall be thoroughly rinsed after each agricultural aircraft operation except when the next agricultural aircraft operation will be made using the same pesticide, or if another pesticide, one which by its manufacturer's recommendations is compatible with that previously in the equipment, and will not result in any adverse effects or illegal residues. Rinsing shall be conducted in an area where an environmental hazard will not be created by the drainage or disposal of waste materials and conducted with methods which will not create an environmental or human hazard.

(f) During application, the flow and mixture of the pesticide(s) shall be uniform. Pilots and contractors shall utilize equipment which will maintain a uniform mixture and flow during application.

(g) Pilots and contractors shall use and operate, in any agricultural aircraft operation, aircraft equipped with spray or spreading equipment suited, according to its manufacturer's recommendations for the pesticide(s) to be applied. All aerial spray or spreading equipment shall be free of leaks and shall have a positive shutoff system to prevent leaking and dissemination of pesticides on any nontarget areas over which the flight is made. Such equipment shall not allow spillage, dripping and backflow or create a hazard from vapors or drift.

(h) No pesticide required to carry a warning on its label indicating toxicity to bees shall be applied by aircraft unless the owner(s) or operator(s) of any registered apiary located within one-half of one mile of the target area is notified not less than 24 hours nor more than 10 days prior to the beginning of a single application or a seasonal spray schedule and given the approximate time of day of application and type of pesticide to be used. It shall be the responsibility of the aerial contractors to obtain the revised apiary registrations for each quarter.

(i) The loading area shall be kept reasonably free of pesticide contamination.

(j) No pesticide(s) shall be applied by an aerial applicator while any persons other than those assisting in the application are in the target area.

(k) The shape of the tank or hopper of the spray or spreading equipment shall be such as to allow complete drainage during flight and on ground.

(l) The contractor or pilot shall report to the board any emergency or accidental release of pesticides from the application or auxiliary equipment if the pesticide poses a hazard or immediate danger to man, animals, or aquatic life, or threat of substantial injury to property. Such a report shall be made immediately to the secretary of the board, or designated alternate, and shall include:

(1) the name of the pilot,
(2) the contractor involved,

restriction shall not apply to ultra-low volume (ULV) 6979
applications.
(4) All applications of the following liquid pesticide 6980
formulations shall be made using a D4 or larger disk with 6981
a 46 whirlplate with the discharge directed with the 6982
airstream or not more than 10 degrees below the 6983
horizontal, and operated at a maximum pressure of 40 6984
pounds per square inch, or a system producing a droplet 6985
size range not smaller than the above system, except for 6986
rotary-wing aircraft flying at speeds of 60 mph or less, 6987
in which case the nozzles may be directed downward:

discharge directed with the airstream or not more than 6997
10 degrees below the horizontal, and operated at a 6998
maximum pressure of 40 pounds per square inch, or a 6999
system producing a droplet size range not smaller than 7000
the above system, except for rotary-wing aircraft 7001
flying at speeds of 60 mph or less, in which case the 7002
nozzles may be directed downward; or
(b) use a boom with outside nozzles placed no closer to the 7003
wingtips than 12-1/2 percent of the total wingspan 7004
distance. If the length of the boom of the spraying 7005
equipment exceeds the nozzle span, a bleeder line shall 7006

Official Analyses of Pesticides 1982

Definitions of Decisions

A summary of pesticides analyzed and the results of samples determined to be at variance from the guarantee are tabulated in the following pages. For the reader's ready interpretation of the report, those designations used are explained in the following paragraphs.

"PASSED" signifies that the labeling and composition of the product satisfactorily complied with guarantees and requirements.

"DEFICIENT" signifies that one or more ingredients fell significantly below the guarantee. Such products are placed under "Stop Sale Orders" and are removed from the market for reprocessing or relabeling. A deficiency penalty is also assessed against the manufacturer.

"EXCESSIVE ACTIVE INGREDIENT" indicates a significant excess of one or more active ingredients. Such formulations could be harmful to the user and/or result in excessive residues.

"ADULTERATED" indicates that quantities of undeclared active ingredients were present above established tolerances. Such lots, batches or brands are stopped from sale and other appropriate action taken.

"MISBRANDED" signifies that labeling failed to conform to requirements. Omission of some item or statement is a more common flaw. Among these may be proper ingredient listing, skull and crossbones, "Poison" in red and antidote where these are required; net contents by weight or volume; class of, and unsulfonated residues of petroleum oils; and percentages of alkaloids instead of crude product such as sabadilla seed.

In some instances of misbranding, the defect appeared to be inadvertent and of a minor nature. In others, removal from sale is necessary.

"NOT REGISTERED" signifies that the product was not registered at the time it was sampled. Any such product is required to be registered prior to release from "Stop Sale Order." A delinquent registration penalty is also assessed against the manufacturer.

As has been the practice in past work, analyses were made largely for those ingredients which were considered of major importance, as, for example, methyl parathion, whereas the related compounds were not checked. For sake of brevity, active ingredients not checked are not listed in Table II. This should not be taken to indicate that manufacturers did not include them on labels. This procedure has been followed because it enables a broader coverage of all products offered for sale.
